Gear • Anti-Bacterial Toothbrush

07/16/2009

WHAT — A toothbrush that kills germs and fungus left on the bristles.

HOW MUCH — \$3 to \$4.

WHERE — MouthWatchers.net

WHY BUY IT — When you brush your teeth, you leave millions of bacteria and fungus on your brush that are there when you brush again. The hi-tech filaments in the Mouth Watchers Nano-Silver Anti-Bacterial Toothbrush kills 99.7 percent of those germs within six hours after the brush has been used. The bristles are harmless to your mouth, teeth and gums. The brush lasts nine months to a year.
